# N.I. Belting Co.

Est. 1988

N.I. Belting Co. Unit 4a, Mosside Business Park, 295 Killaughey Road  
Donaghadee, Co Down BT21 0LY

*N.I. Belting Co. was established in 1988 as a small family business and has grown into a reputable and successful company throughout the industry. The importance to offer an honest and reliable service is the forefront of our business. We understand the needs of our customer and how important it is to obtain value for money whilst not compromising on quality and that is something we are hugely successful at. We manufacture and stock a vast range of Conveyor, Processing and Transmission belting as well as associated products and Engineering Plastics.*

## FOOD BELTING

NI Belting understands the concerns and challenges in the food handling industry. Whether your food needs are in Meat, Poultry, Bakery, Vegetable, Seafood, Dairy or Confectionery, we have a belt to suit your requirements. All our belts comply with the latest European and International food regulations, our HP® belts fully support all the HACCP procedures throughout the complete food manufacturing process, and data sheets can be supplied on request.

*Whatever your requirements we have a belt to suit your application.*

## TRANSMISSION BELTING

Flat transmission belting is a low cost and more efficient alternative to multiple Vee belt drives. Unlike other forms of power transmission belts there is no limit to the lengths to which flat belts can be produced. We stock a wide range of flat belt materials to suit many applications including, Woodworking machines, Lathes & Grinders, Textile Machines, Large compressors & Fans. Belts can be supplied joined endless or with mechanical fasteners.

**We manufacture any belt to your size.**

## CONVEYOR BELTING

With a wide variety of different belt types available we can provide the ideal conveyor belt for your application. Belt material types include, PVC, Polyurethane, Polyester, Silicone & Rubber. We fabricate belts to our customer's exact requirements. Attachments can be welded onto belts to assist with belt tracking & product positioning. Belts can be supplied vulcanised endless or with mechanical fastener joints.

**We offer an excellent onsite vulcanising service, as well as 24/7 emergency call out.**

## TIMING BELTS, SPECIAL TIMING BELTS

We are widely known for our supply of Timing belts/ribbed belts, Double sided and Truly endless belts and have a large range we keep from stock, if you require something more specific we supply special coated Timing belts with various covers, cleats and holes and TruVertical form fill seal machine belts.

## METAL CONVEYOR BELTS

We supply a variety of metal conveyor belts which include rod network belt, corner network belts, spiral link belt, wire mesh belts, and suitable accessories catered to your application

## MODULAR

Our modular belting is manufactured from 6.25mm to 75mm pitch in traditional materials, Polypropylene, Polyethylene & Polyacetal. In order to solve tasks out of the ordinary, we are able to deliver a variety of special materials as well as additives.

**All standard materials are FDA approved**

## ENGINEERING PLASTICS

We are stockist and suppliers of various plastic materials such as Acetal, Nylons, Polyethylene, Polypropylene, PTFE and many more supplying everything from billets, blocks, sheets, Rods and Machined parts in a wide range of colours.

**We can cut to any size you require with our in house cutting facilities.**

## PTFE (TEFLON®), SILICONE PRODUCTS

We offer various PTFE belts, sheets and tapes these can also be tailored to your requirements with available accessories such as studs, fasteners and stitched. We are renowned for our Silicone extrusions which can be made to any size requirement and come in a variety of colours and hardness's.

## ROLLERS

We supply rollers for a wide range of conveyor roller systems, from stainless steel, zinc-plated, mild steel and PVC in tube diameters ranging from 20mm to 159mm Drive and idler drums supplied in Mild steel, Stainless steel, Polypropylene or UHMW. Diameters from 60mm to 254mm.
